THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The Altenhain Ammunition Dump was located about two kilometers north of the village of Altenhain. The depot covered a total area of about two to three kilometers in an east-west direction and  $1\frac{1}{2}$  to two kilometers in a north-south direction. The ground between the village and the ammunition dump was grass and lower than the wooded area to the north.

There were about three, brick-stucco, one story buildings at the southern edge of the area surrounded by a barbed wire fence. One of the buildings was used as a messhall for German employees.

50X1-HUM

2. [ ] the 21st Tank Division, the 57th Guards Rifle Division and the 20th Rifle Division, all under the 8th Guards Rifle Army, were supplied by this installation. The dump received its supplies by rail directly from the Soviet Union; supplies were shipped out only by train. [ ] there were trains from Naumburg, Weissenfels, Weimar, Jena and Gotha which arrived to load supplies. [ ] about 500 railroad cars with surplus and defective arms and ammunition were

received, and [ ] the surplus material was sent to the Soviet Union. During that same month, all units of the 8th Guards Rifle Army were ordered to turn in all surplus arms and ammunition before moving to summer headquarters.

3. In addition to being an ammunition and weapons dump, this installation also had facilities for the inspection, overhaul and repair of armament. All types of weapons, including field artillery pieces and antiaircraft guns with their optical instruments were repaired here. Units of the 8th Guards Army were supplied spare parts for their weapons by the depot.
4. There was a nine months course for 8th Guards Army armament specialists at the installation. Subjects included field repair and maintenance of light weapons, artillery pieces and optical instruments. About three EM from each regiment took the course at the same time. Each year artillery officers from units of the 8th Guards Army also took a refresher course there which lasted about one week.

5. [ ] the total number of military personnel at Altenhain to be between 720 and 900.

In addition to the military personnel, there were about 150 German female employees who worked under the supervision of Soviet Army personnel, cleaning and preparing weapons for storage, loading and unloading weapons and ammunition.

6. /The points listed hereunder refer to an overlay, Altenhain Ammunition Dump (Enclosure A)/

#42 WATER BASIN. Constructed of concrete. About 10 by 10 meters.

#43 through #84 UNDERGROUND STORAGE FOR AMMUNITION.

[redacted] there were about 50 to 60 storage rooms built by the Germans during or before the last war. The bunkers were constructed of concrete, about 10 to 15 meters and four meters high. Each bunker had a single room without partitions. The thickness of the concrete roof was about 80 cm, and the thickness of the earth on top of the bunkers was about one to 1½ meters. The earth was covered with grass and trees. The interiors were completely dry. Each one had two green metal doors, facing south, about 1½ meters wide and 1.80 meters high. On each door there was [redacted]

(H Slavonic N.).

[redacted] to facilitate the location of the various types of ammunition. Ammunition for tank gun shells was stored in Bunkers, Points #75, through #84. Ammunition for rifles and submachine guns (PPSH) was stored in bunkers, points #70 through #73. [redacted] in one bunker there were at least 800 boxes, each containing 2500 rounds for PPSH type submachine guns.

#55 DIRT ROADS. Covered with gravel and about three meters wide.
